The fruits of the Earth
in good hands.
Since 1967.

Living in symbiosis with nature always produces good fruits. And having the right tools to maintain this result over time is crucial. For more than 50 years Cifarelli has been at the side of those who work the land with extremely reliable, high quality and safety professional agricultural machines. That is why more and more farmers and green lovers choose the products of our Company.

The micronization of the dispensed drops. This is the solution that makes this professional machines much more efficient than others. Thank to this, the treatment both in cultivation and in plant are extremely effective and allow you to save liquids. You can also appreciate the qualities of maneuverability, lightness and ductility of the machine and the advantages of a range designed to respond to everyone's need.

Can a machine operate delicately? Our electronic harvester yes. Not only thanks to its lightness and its great maneuverability but also its ability to adapt to the times collection and different types of plants.

In agriculture, nothing should be left to chance. And nothing should be left on the ground once which has been provided, for example, to the harvest of olives, nuts or plums. Then when the leaves too have fallen, a further cleaning phase helps keep crops in order, rows and gardens. Thus, in a free field, you can work more easily and in a way more effective.

ONLY 19,5 KG

For those who daily take care of cleaning, care and maintenance of green spaces and urban areas, having a tireless and powerful helper in vacuuming ensures that your job is done.

The **V1200PK** is the lightest vacuum cleaner on the market. Vacuums and shreds even large, dry or wet sheets, paper and light materials quickly and conveniently. Its low weight simplifies loading and unloading operations from the van and the application at the edge of even light vehicles to reach hard-to-reach areas. In addition, thanks to the reduced volume of the shredded material, it is possible to work without continuous interruptions to empty the container and optimize productivity. It is ideal to support the work of gardeners, maintenance technicians, ecological operators and all professionals who deal with the care and maintenance of green, urban and extra-urban spaces.

Accessories

Our goal is to continually improve. And another quality of our machines is their versatility and adaptability to the work needs of each operator. For this reason, many accessories are available in various models (M1200, L3Evo, BL1200 and V1200) that expand and refine the functions provided.

L3Evo / M1200

0G.334.00
BOOSTER PUMP
Keeps the solution constantly mixed within the liquid tank, increases and stabilizes the product outlet pressure.

0G.392.00
EXTENSION PIPES
Suitable for particularly ventilated areas, it allows the approach to the area to be treated reducing the dispersion of the product (booster pump required).

0G.345.00
KIT FOR BLOWING
Pipes and diffusers for blowing.

0G.150.00
KIT 3 CALIBRATED NOZZLES
Three nozzles of different colors with calibrated pad Ø 1.5 - Ø 2.5 - Ø 4.0. Calibrate the amount of product output (recommended to use with the booster pump).

M1200 only

0G.391.00
KIT INVERSION PIPE
Carry out the treatment in the opposite direction to the operator's direction.

0G.395.00
ADJUSTABLE DIVERTER KIT
Adjusts the angle of inclination of the outgoing flow.

0G.346.00
KIT FOR POWDERS AND GRANULAR
Ideal for the application of powder, granule and seed products.

0G.341.00
DIVERTERS KIT
It includes the 45° tilted grid to divert the product outlet, the circular grid to dampen the velocity of the exhaust air for greenhouse treatments and the double-angle grid to separate the flow in two directions.

0G.394.00
ULV DIFFUSER
It calibrates the amount of outgoing product and allows ultra-low volume treatments with a droplet diameter of less than 70 µm (it is recommended to use it with a booster pump).

0G.275.00
SPHERICAL DIVERTER
It allows to direct the liquid at the same time in two rows.

0G.340.00
BOOSTER AND FILLING PUMP
Keeps the solution constantly mixed inside the liquid tank, increases and stabilizes the product outlet pressure. Allows filling of the liquid tank without removing the device from the shoulders.

BL1200

0G.373.00
KIT FOR BEES
Usable also with M1200 Mist sprayer
Useful in beekeeping to keep bees away during the cleaning of the combs that precedes the honey extraction phase.

V1200

99.310.01
TROLLEY
It can be used with the V1200 vacuum and BL1200 blower, it avoids the users having to carry the machine on their shoulders.
