

BL2200

**ERGONOMIC. POWERFUL.
LIGHTWEIGHT. COMPACT.**

The new **BL2200** blower combines the power of the two-stroke Cifarelli C7 engine with an even more compact design. The machine has a side air filter and a new shoulder support system which makes it less bulky in height than the BL1200. The new design makes this blower even more manageable and allows you to work even in narrow areas and under the plants without the branches fitting into the filter.

The fruits of the Earth in good hands. Since 1967.

It is not always true that the wind goes where it wants. Using our blowers, you can give it both the intensity and direction you want. Even the most difficult to handle bed leaves can accumulate where you decided.
