

L3evo

POWERFUL, PROFESSIONAL AND EASY TO USE, ERGONOMIC

**NEW
CE
VERSION**

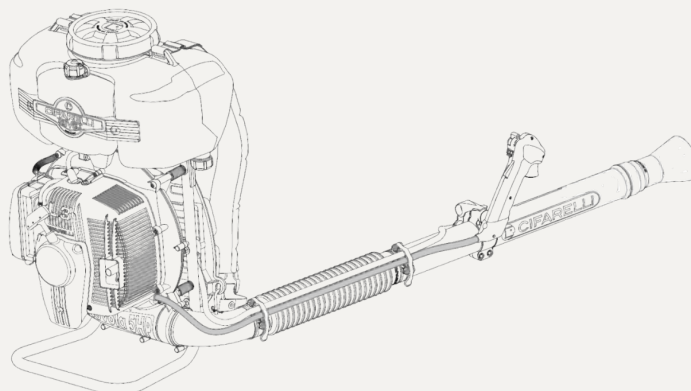

L3EvoEU, the CE version of the renowned L3evo, is a machine designed for professionals that ensures excellent performance. Its 12L tank and compact structure make it lightweight and ideal for easy maneuvering on any terrain. Additionally, comfort is ensured by the padded cushion and adjustable wide shoulder straps, providing perfect ergonomics during use.

The fruits of the Earth in good hands. Since 1967.

	L3EvoEU	
Engine	Model C7 / 2-stroke / 77 cc / 3,6 kW	
Air speed	125 m/s	
Volume aria	20 m ³ /min	
Dry weight	Without tubes 10,71 Kg	
Liquids tank capacity	12 L	
Fuel tank capacity	1,9 L	
Drops micronization	Ø 120 µm	
Liquids outflow	0-3,6 L/min	
Maximum range	Horizontal: 17 m	Vertical: 15 m
Packaging	49 x 74 x 38 cm	Accessories: see accessories page

The L3EvoEU mist sprayer ensures excellent performance in a compact and lightweight design. With intuitive management, a 12-liter tank, and the option for a booster and filling pump accessory, the L3EvoEU is the ideal ally for your daily work. Focus on ergonomics: the new attachment of adjustable padded shoulder straps provides unparalleled comfort. Its simple maintenance ensures excellent reliability, reflecting the quality of Made in Italy.

Accessories

Our goal is to continually improve. And another quality of our machines is their versatility and adaptability to the work needs of each operator. For this reason, many accessories are available in various models that expand and refine the functions provided.

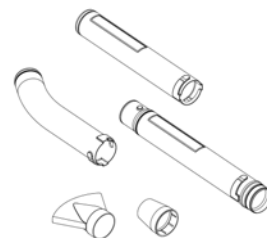

OG.425.00
BOOSTER PUMP

It keeps the solution inside the liquid tank always mixed, it increases and stabilizes the product outlet pressure.

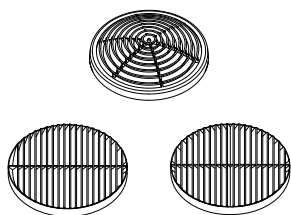

24.019.00
EXTENSION TUBE

It is suitable for particularly aired areas. It allows getting close to the area to treat, while reducing the product dispersion (the booster pump is necessary).

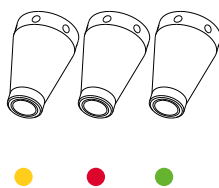

OG.095.00
KIT FOR BLOWING
Pipes and diffusers for blowing.

OG.341.00
KIT 3 DIVERTERS

It includes the 45° grid for diverting the product outflow, the round grid for decreasing the speed of the outcoming air, for greenhouse treatments and the double-angle grid for separating the flow in two ways.

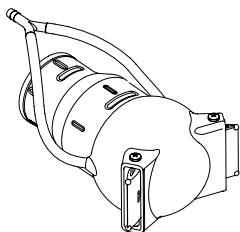

OG.150.00
KIT 3 CALIBRATED NOZZLES

Three nozzles of different colors with calibrated pad Ø 1.5 - Ø 2.5 - Ø 4.0. Calibrate the amount of product output (recommended to use with the booster pump).

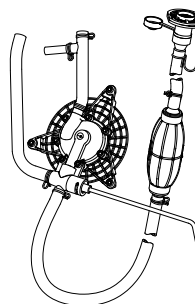

OG.104.00
ULV DIFFUSER

It doses the amount of the outcoming product and allows performing ultra low volume treatments to obtain drops Ø less than 70 µm (the booster pump is recommended).

OG.274.00
SPHERICAL DIVERTER

It allows to direct the liquid at the same time in two rows.

OG.426.00
BOOSTER AND FILLING PUMP

It keeps the solution inside the liquid tank always mixed, it increases and stabilizes the product outlet pressure. It allows filling up the tank without having to take the equipment off your shoulders.
